

City of Humble 2016 Concrete Pavement Improvements Project

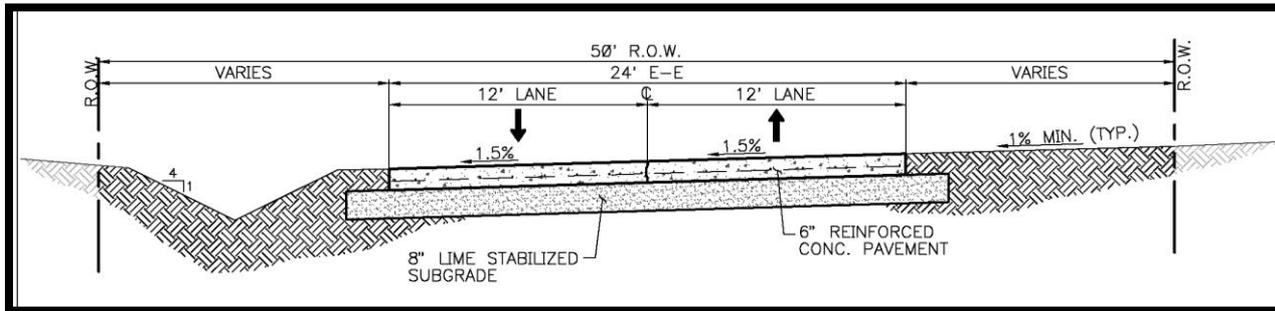

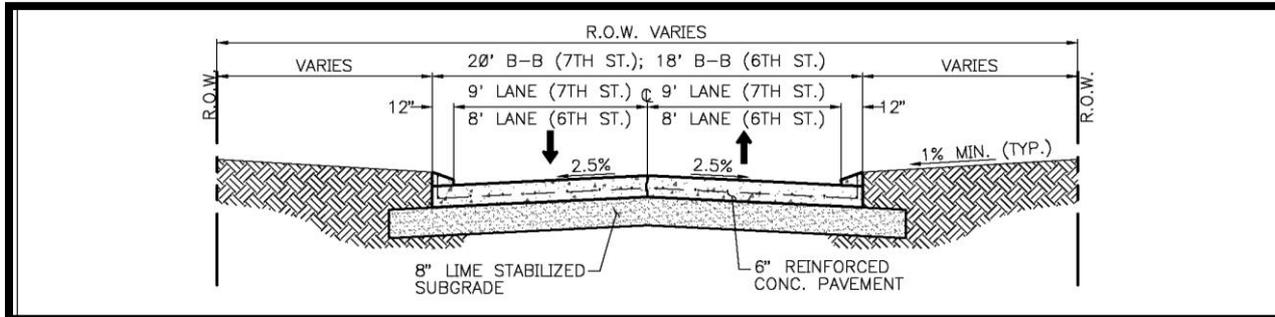

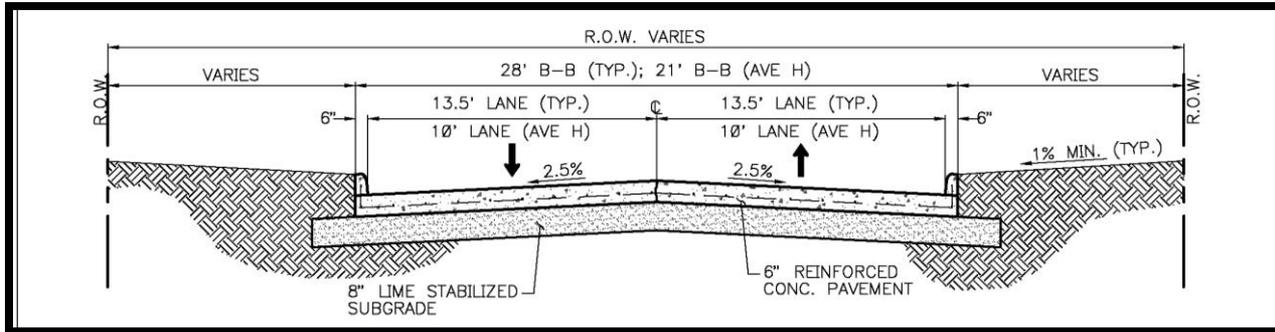

Public Meeting – August 16, 2016

Project Location

Typical Pavement Sections

Proposed Improvements

■ Area North of 1st Street

- Reconstruct existing streets with 6” thick concrete pavement and curbs
- Install new sanitary sewer lines and water lines within the subdivision
- Drainage will remain as existing (surface drainage along street gutters)
- Install drainage curb inlets at various locations

■ Hirsch Street

- Install new water line

Proposed Improvements

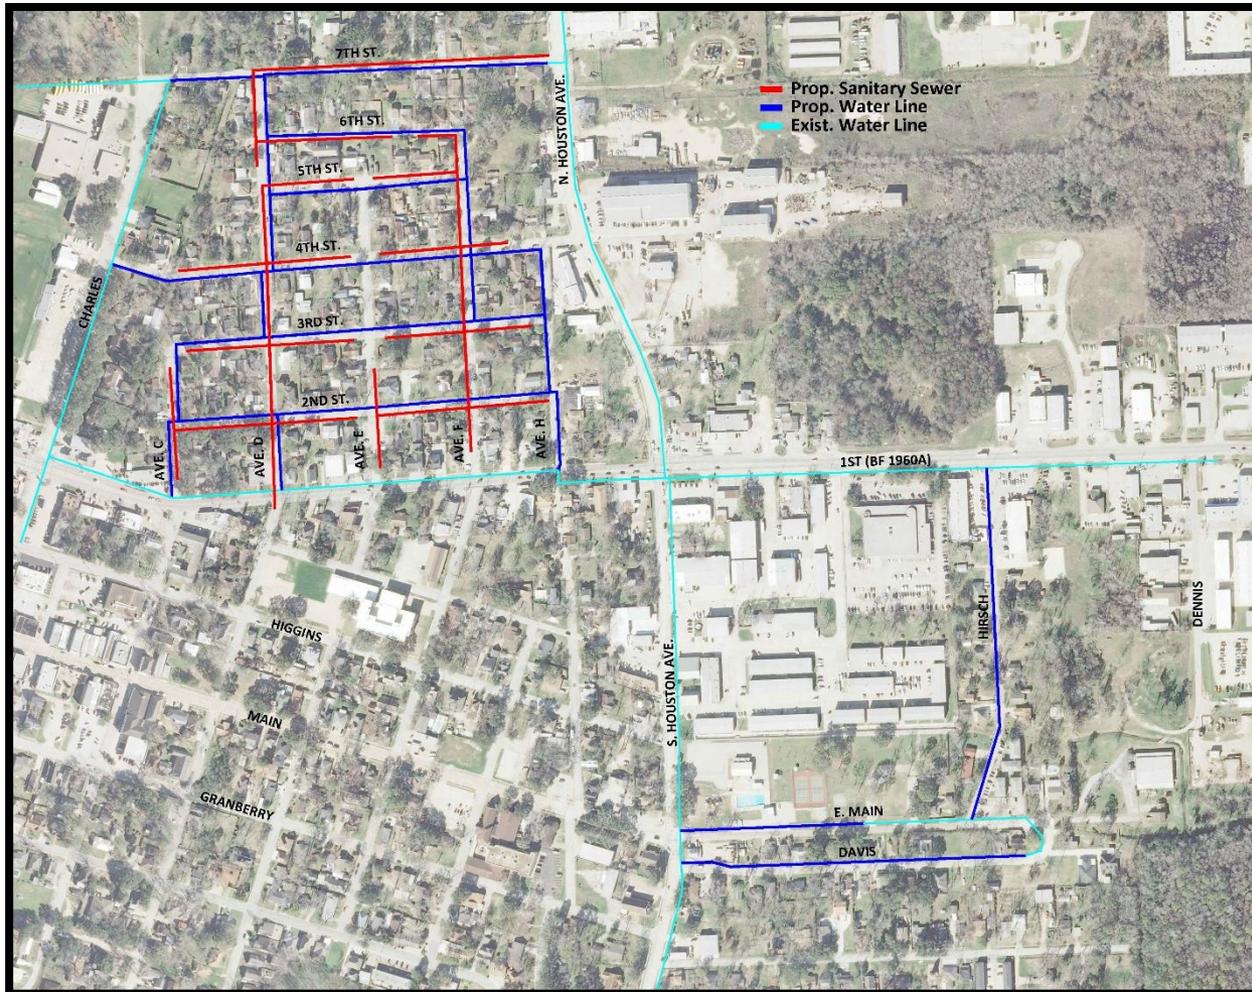

■ Davis Street

- Reconstruct existing street with 6” thick concrete pavement and curbs and install new water line
- Existing sanitary sewers previously rehabilitated

■ Main Street

- Reconstruct existing street with 6” thick concrete pavement without curbs
- Replace existing storm sewer with new concrete pipe
- Replace section of existing water line
- Replace existing sanitary sewer force main to Dennis Street Lift Station

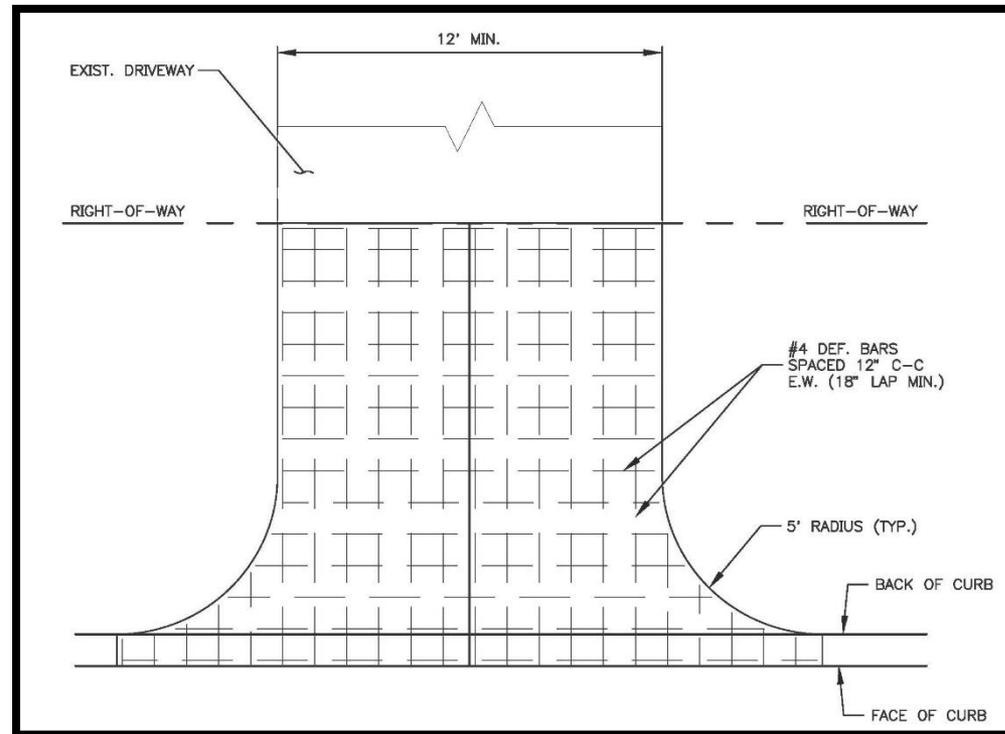

Proposed Utility Improvements

Key Construction Items

■ Driveway Replacement

- Existing driveways to be replaced with concrete up to the right-of-way (Contractor will coordinate this work with the homeowner)

Key Construction Items

■ Sprinkler Systems

- Existing sprinkler systems may need to be removed and replaced during construction
- Contractor will coordinate with homeowner at beginning of construction to identify sprinkler head locations
- Existing sprinkler systems in conflict will be temporarily removed and replaced to the original location, as close as possible, after construction is complete

Key Construction Items

■ Mail Delivery

- Contractor will coordinate with local postal service department to maintain mail delivery throughout construction
- Temporary mail boxes or mailbox clusters on one side of a street or at a suitable location may be set up as needed

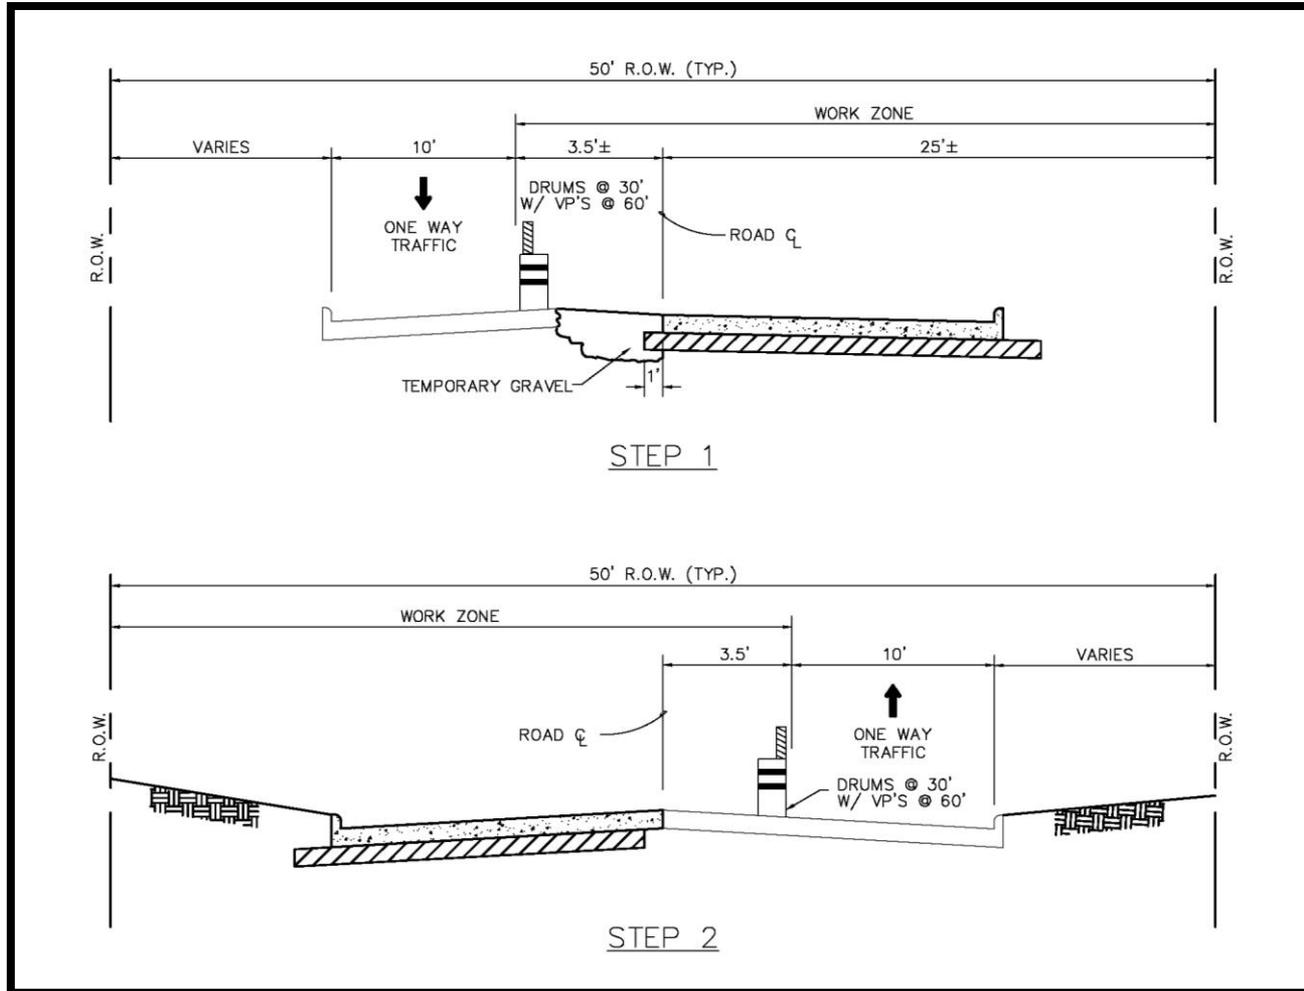

■ Trash Pickup

- Contractor will coordinate with the residents to maintain trash pickup services during construction

Construction Sequencing

- Goal of this project is to complete the improvements with minimal disruption
- Streets will be reconstructed one lane at a time with one-way traffic maintained on the adjacent lane
- Detours will be provided as needed
- Will need resident assistance and support to accomplish parking during construction

Construction Sequencing

Construction Sequencing

- This project will affect your daily routine
- Exercise caution and care while driving through construction areas
- Project safety is of utmost importance
- Disruption of services (water, sewer, cable, gas) may occur during construction
- Please allow adequate time and utilize detour routes for travel in and out of the subdivision

Special Needs Form

- Please complete the provided form and return to the City for any special needs that need to be considered during construction
- If you know of anyone who may have special needs that is not at this meeting, please let us know
